

Quality Australian Livestock for Global Markets

Integrity Australia is an Australian owned company that supplies international customers with quality Australian livestock exports.

Our uncompromising and experienced team together with trusted farming relationships provide international customers with the strongest access point for the supply of healthy, quality Australian livestock.

Integrity: It's in our name for a reason.

Honesty. Trust. Transparency. That's what we mean by "integrity". These are the principles that we value and it's the way we do business. This is what our trusted partners and clients have grown to expect from us, and it's what we deliver. Project after project. Time after time.

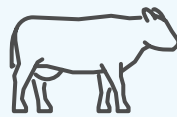

Our team consists of highly experienced professionals whose integrity and knowledge in the business of livestock is beyond question.

That's probably the reason for our success!

**Let the leaders
in sourcing
quality livestock
assist you.**

At Integrity Australia, we can provide Australian livestock of the highest quality across a range of species. Our experience and expertise in "everything" livestock makes us the best partner for your requirement.

Breeding Beef Cattle

Breeding Sheep

Breeding Goats

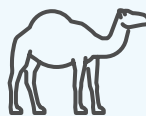

Breeding Dairy Cattle

Breeding Alpaca

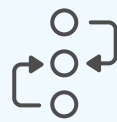

Breeding Buffalo

Breeding Camels

Our Process: Developed through a deep understanding of the needs of our clients.

Ensuring a quality experience for you at every step.

At Integrity Australia, we know exactly what our clients are after. We have developed robust processes that cover every aspect of livestock export preparation and delivery.

From Collaboration & Consultation at the very onset (to ensure we understand your requirements), to Overseas Discharge, and everything in between, our process is thorough and comprehensive, covering everything that you need.

Collaboration & Consultation

We work closely with clients to establish their livestock needs. Our in depth knowledge of livestock and the Australian industry helps us to deliver solutions that are well researched and achievable, without compromising quality.

Procurement

We procure the right animals for our international customer through visiting the farm, inspecting and then selecting only livestock that meet the specification. We work closely with farmers to ensure all required traceability, welfare and health requirements.

Quarantine

The requirements within quarantine process are determined by the importing country health requirements. We will only partner quarantine facilities that have the same ethos for animal handling and management as our business.

Loading

The livestock will be transported from the quarantine premise to the port of loading by transport operators selected by Integrity Australia. We always use logistical experts that have knowledge and experience of the live export process.

Overseas Discharge

A representative of Integrity Australia will always be present at the arrival and discharge of the livestock in a foreign market. It is our attention to detail and care to the very end that makes us the perfect partner

Integrity Assist

The process doesn't stop at discharge for importing customers. We have an existing capability in aspects of health, nutrition, production, handling and welfare to support our international customers in establishing a sustainable enterprise for new livestock.

Nationwide network of trusted partners.

Over the decades, Integrity Australia has developed strong relationships across Australia in the agribusiness sector. This gives us the confidence to meet your needs, because we know we have an extensive network of trusted partners focussed on meeting your needs.

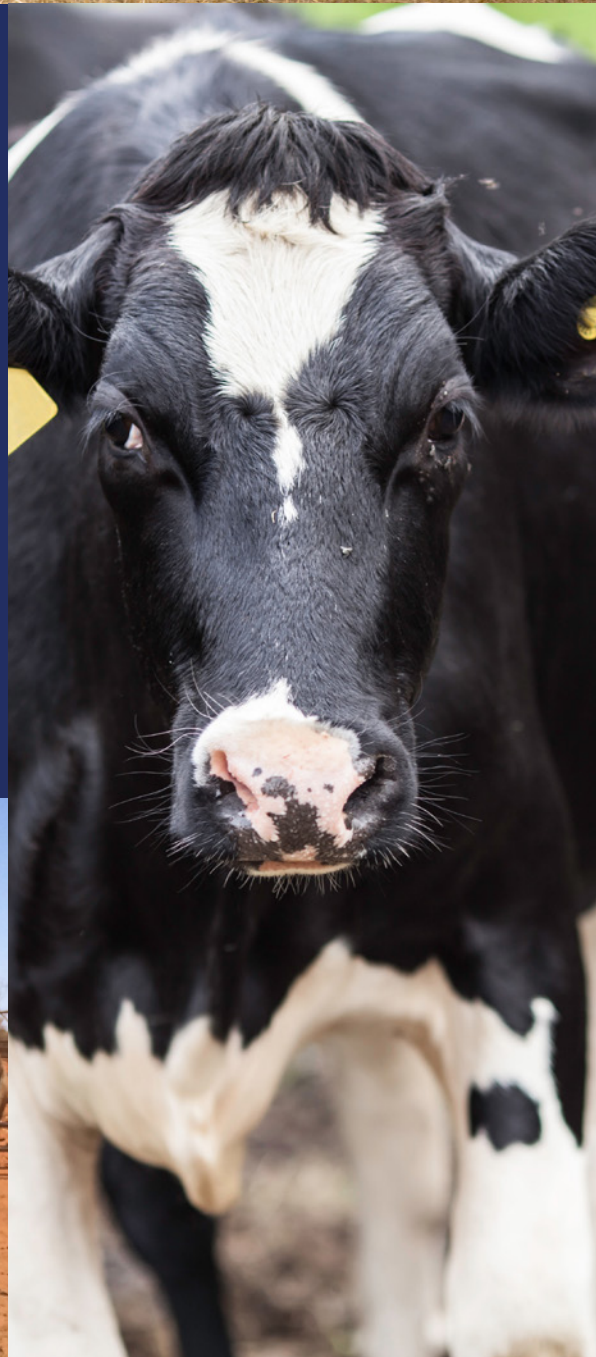

Contracting Services

Our team offers a “whole of export supply chain” service model to the Australian export industry. Our offering can be tailored to suit your specific needs.

We have a history of developing trusted relationships where customers extract value and benefit from the personalised commitment we provide. We take pride in our ability to supply and deliver exacting requirements.

It is our view that Integrity Australia provides exporters with the strongest possible entry point for the supply of healthy, quality Australian livestock.
